

You need to bring your pet to Animal Emergency Center any time your regular veterinarian refers you to us or when you notice any of the following problems:

Difficulty breathing, noisy respiration, tongue turning blue, gasping for breath

Bloated or painful abdomen with or without vomiting

Any difficulty urinating or defecating

Heatstroke

Pain, severe or continuous

Trauma, injury, or shock from falls, vehicle accidents, cuts, broken bones

Any sign of weakness, collapse, loss of balance, seizure, sudden changes in disposition, etc.

Ingestion of any poison, chemical or plant. (Bring the container if it is available.)

Vomiting or diarrhea

Or any time you are concerned about your pet's health.

**IF IT SEEMS LIKE
AN EMERGENCY
TO YOU,
THEN IT IS
AN EMERGENCY
TO US.**

Providing pets with excellent after-hours medical care since 1975

Animal Emergency Center was established in 1975 by a group of Memphis area veterinarians to provide after-hours care to their patients. Today, Animal Emergency Center is the preferred emergency clinic and referral center for the majority of the veterinarians in the tri-state area.

Animal Emergency Center works in cooperation with your regular clinic to provide around-the-clock care for your pet.

Animal Emergency Center has a well-trained, experienced staff ready to serve your pet's critical care or emergency needs - nights, weekends, and holidays.

Monday through Friday - 6 p.m. to 8 a.m.
Saturday - 12 noon to 8 a.m. Monday

Pets hospitalized at Animal Emergency Center are discharged to return to their regular veterinarian each business day.

Animal Emergency Center is equipped with:

+ An in-house lab to provide rapid results of blood chemistries, CBC, electrolytes, and coagulation factors.

+ X-ray equipment with automatic processing.

+ Surgery suite with state of the art monitoring equipment.

+ Oxygen cages, as well as other techniques for providing continuous oxygen therapy.

+ Infusion pumps to guarantee consistent fluid therapy.

Dr. Bill Miller, Veterinary Ophthalmologist, is available Monday through Wednesday.

Dr. Terry Dew, Board Certified Surgeon, is available each Tuesday for bone and soft tissue surgery, ultrasound, etc.

MRI

Your medical doctor has used it for years. Now it is available for your pet. Seizures, lameness, back pain, sudden-onset blindness, tumor assessment?

MRI could give you the answer.

Specialty services are available by referral only.
