

The Most Comprehensive Hand Care in South Mississippi

2010 Hand Symposium

October 9, 2010

Biloxi, MS

**“Surgical and Therapy Management of
Soft Tissue Disorders of the Upper Extremity”**

Course Description

Effective Treatment of soft tissue injuries of the upper extremity requires thorough knowledge of anatomy, biomechanics and medical/therapy intervention. Specific injuries covered include: rotator cuff and labral tears, cubital tunnel syndrome, biceps rupture, TFCC tears and scapholunate tears. Medical and surgical intervention as well as rehabilitation protocols and activities will be covered. Lab session will include cadaver anatomy and surgical procedure observation in an outpatient surgical suite.
