

# STEELCRAFT®

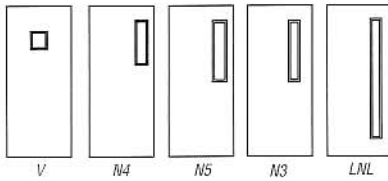

## Full Flush Doors

Full flush doors are defined as having no seams on the face, but seams are permitted on the edges. Doors are available in commercial quality carbon steel or A-60 galvanized steel. Steelcraft's L-, B-, T- and CE-Series doors meet this specification.

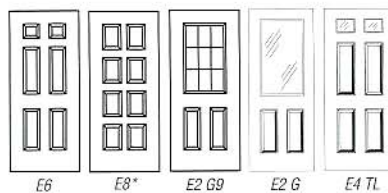

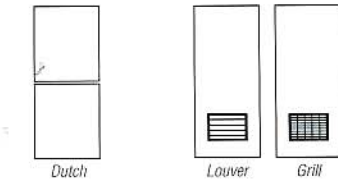

### Full flush panel and half glass doors

### Doors with glass lites

### Dutch Doors Doors with louvers or grilles

\*Available in 20 gage only.

## L-SERIES

The L-Series door has a honeycomb core, beveled hinge and lock edge door with a visible seam on both edges. Optional cores are polystyrene and polyurethane. L-Series doors are available in 14, 16, 18 and 20 gage steel.

## B-SERIES

The B-Series door has a steel stiffened door with visible seams on the hinge and lock edges. 20 gage steel stiffeners are welded to the face sheets vertically, 4" on center and are located 6" on center horizontally. Void areas between the stiffeners are filled with fiberglass. B-Series doors are available in 14, 16 and 18 gage steel.

## T-SERIES

The T-Series doors are designed to meet the requirements for temperature rise fire-rated applications. These doors include the same construction features of the L-Series doors. T-Series doors are available in 14, 16, 18 and 20 gage steel.

## CE-SERIES

CE-Series are decorative doors featuring deeply embossed panels on both sides creating the appearance of hand carved doors. The door includes all the construction features of the L-Series door and is available with half glass, dual vision or a 9-lite design. These doors are available in 16, 18 and 20 gage steel.

<b>L- &amp; B-Series</b>	7'0" (2134mm)	8'0" (2438mm)
	7'2" (2184mm)	10'0" (3048mm)
<b>Standard Heights</b>	6'8" (2032mm)	7'0" (2134mm)
<b>CE-Series</b>	8'0" (2438mm)	
<b>Standard Widths</b>	increments of 2" (50mm) from 1'6" (457mm) to 4'0" (1219mm)	
<b>L- &amp; B-Series</b>		
<b>Standard Widths</b>	increments of 2" (50mm) from 2'6" (762mm) to 3'8" (1118mm)	
<b>CE-Series</b>		

## DESIGN OPTIONS

### GRAIN-TECH®

GRAIN-TECH® doors are L-Series doors, produced using steel sheets that have been embossed to create a wood grain appearance. GRAIN-TECH® doors are fabricated from stainable steel and available with an optional factory finish in six standard color stains, and a factory applied clear top coat with ultra violet (uv) inhibitors. GRAIN-TECH® gives you the look of wood and the durability and fire rating of a steel door. Truly the best of both worlds!

### Stainless Steel

LS-Series stainless steel doors are designed to meet and exceed harsh environmental exposures like: chemicals, water, moisture and others. These doors include similar construction features of the L-Series and are available in 18 gage #304 (or 316) stainless steel.
