

CASE STUDY: Davis and Wilkerson PC, Austin, Texas

Privacy and aesthetics achieved

SITUATION: In keeping with the current trend toward open plan office spaces, glass is used as the divider for work areas, conference rooms, and open hallways. While glass-walled office cubicles and conference rooms create a sense of freedom and openness, interiors can appear spare with little privacy. Mary E. Smith, Facilities Manager for Davis and Wilkerson, was determined to overcome the drawbacks of an otherwise perfect office layout.

SOLUTION: A local LLumar dealer recommended installing LLumar NRM-PS2 frosted film on the interior glass areas. This non-reflective film provides an elegant look throughout the office area and delivers private spaces where attorney and clients can meet unobserved.

RESULTS: The professional installation was quick and caused little or no inconvenience. Maintenance is easy using standard cleaning products, including those with ammonia. Davis and Wilkerson retained the open ambience that was desired while still achieving the important privacy that is often needed in client-attorney relations.
